

Williamson County Republican Party

Williamson County, Tennessee

June 16, 2023

Whereas, we now live in a country with a two-tiered justice system, as punitive and petty as it is politicized . . .

Whereas, all previous attempts to destroy or damage President Trump have in fact exonerated him, and the charges themselves have proven to be based on malice, lies, and collusion . . .

Whereas, as with so many allegations in the past, this outrage is being used to distract the American public from true and undeniable corruption, from the erosion of our freedoms, and from the anarchy at our border and around the world . . .

Therefore, let it be known that the Williamson County Republican Party stands resolutely with President Donald Trump.

However, the renewed attacks on President Trump are but the tip of the political iceberg, and all our values are being impacted at once.

Thus, let it be known that we reaffirm our stance as pro-life.

Let it also be known that we stand with parents and grassroots organizations, derided as terrorists and hate-groups, because they fight to protect children from the grooming and hyper-sexualization that has tainted many of the library books and lesson plans.

Likewise, let it be known that we stand with legislators protecting confused children from agenda-driven groups who seek to force irrevocable changes before these children are mature enough to comprehend.

Let it be known that we stand with citizens who are seeking to educate themselves in order to affect positive change—such as learning more about Election Integrity, warning others of the dangers of ESG, or defending against the attacks on our medical freedoms.

We stand for energy independence, free markets, hard currency, and for corporations and financial institutions that make sound economic decisions instead of equity-based business suicide.

We stand in eternal favor for the 2nd Amendment and Constitutional Carry; we are for the military, for first responders, and border control.

All that being said, we stand for the 1st Amendment; we welcome dialogue and debate. As Republicans we can agree to disagree. Iron sharpens iron. And only then can we be . . . one nation, under God, indivisible, with liberty and justice for all.
